PRECAUTION NEEDED To Prevent a Spread of Texas Cattle

Fever Through the Country.

CIRCULAR FROM SECRETARY RUSK. Stock Coming From the Proscribed District

to be Quarantined. THEIR CARS MUST BE DISINFECTED

WASHINGTON, July 5 .- Secretary Rusk to-day signed the following circular of intructions which will be sent to the managers and agents of all railroad transportacompanies of the United States, to

whom it is addressed: DEPARTMENT OF AGRICULTURE, JULY 3, 1889. In accordance with section 7 of an act of Congress, approved May 29, 1884, entitled "An act for the establishment of the Bureau of act for the establishment of the Bureau of Animal Industry, to prevent the exportation of diseased cattle and to provide means for the suppression and extirpation of pleuro-pneumonia and other contagious diseases among domestic animals," you are hereby notified that a contagious and infectious diseases known as splenetic or Texas fever exists among cattle in the following, described area of the United States: All that country lying south and east of a line commencing at the northeasterly corner of the county of Crittenden, in the State of Arkansas, thence running in a northwesterly direction to the Osage agency, in the Indian Territory, and thence running southwesterly to the Hio Grande river at the Intersection of the southeasterly corner of Pelection of the country control of the country corner of Pelection of the country corner of Pelection of the country control of the country corner of th intersection of the southeasterly corner of Pe cos county and the northeasterly corner of Pre sidio county, in the State of Texas.

RULES TO BE OBEYED. No cattle are to be transported to any por-tion of the United States north and west of the First.—On unloading north and west of this line any cattle in course of transportation to be fed and watered on the way, the places where said cattle are to be so fed and watered shall be set apart, and no other cattle shall be admitted into said places. Once a week, from the date hereof until the first day of December, 1889, these watering and feeding places shall be thoroughly cleansed and disinfected.

Second—On unloading said cattle at their points of destination, the regulations prescribed by the cattle sanitary officers of the State, where unloaded, relating to the movement of Texas cattle, shall be carefully observed.

ment of Texas cattle, shall be carefully observed.

The cars that have carried said stock shall be cleansed and disinfected before they are again used to transport, store or shelter animals. The cars used to transport such animals and the pens in which they are fed and watered shall be disinfected in the following manner:

(A.)—Remove all litter and manure. This litter and manure may be disinfected by mixing with lime, sulphuric or carbolic acid, or if not disinfected it may be stored where no cattle can come in contact with it until after December 1.

(B.)—Wash the cars and the watering and

B.)-Wash the cars and the watering and feeding troughs with water until clean.

(C.)—Saturate the wall and the floors of the cars and the tencing, troughs and chutes of the pens with a solution made by dissolving four ounces of chieride of lime to each gallon of

HEAVY LOSSES TO AVOID. The losses resulting yearly to the owners of Northern cattle by the contraction of this dis-ease from contact with Southern cattle, and ease from contact with Southern cattle, and through infected cars, and by means of the manure carried in unclean cars from place to place, has become a matter of grave and serious concern to the cattle industry of the United States. It is necessary, therefore, that this cattle industry should be protected, as far as it is possible, by the adoption of methods of disinfection in order to prevent the dissemination of this disease.

infection in order to prevent the dissemination of this disease.

A rigid compliance with the above regulations will insure comparative safety to Northern cattle and render it unnecessary to adopt a more stringent regulation, such as the absolute probibition of the movement of Texas cattle, except for slaughter, during the time of the year that this disease is fatal.

Inspectors will be instructed to see that disinfection is properly done, and it is hoped that transportation companies will cordially put in operation the above methods.

Very respectfully,

J. Rusk, Secretary.

The inspectors referred to will be named

LOCAL ITEMS, LIMITED.

MESSES H. M. BYLLESBY, T. A. Gillespie and Alexander McKaig, of this city, arrived in the city resterday from a tour in Europe.

THE freight rates for iron and steel destined for St. Paul and other Northwestern points, have been advanced from 9 to 10 cents per 100 pounds.

THE Relief Department of the Pennsylvania Company's lines is flourishing. Since it was started June 1, over 1,100 of the employes joined it. C. C. AUGHINBAUGH, the proprietor of the Aughinbaugh House, East End, has assigned his property in the value of \$10,000 for the ben-efit of his creditors.

AT the hearing before Alderman Cassidy yes-terday afternoon, John Kennedy, charged by G. Galley with embezziement, was discharged for want of evidence.

HEINRICH MYER accidentally shot himself in the head yesterday morning. He went to the Allegheny General Hospital, where the bullet was extracted.

POLICEMAN LESTER has been suspended on the complaint of John McKeown, who alleges that Lester hit him on the breast and made fun of him because he wore a Hibernian badge. CHARLES HOFFMAN, Captain of No. 11
Engine Company, has been detailed to act as
assistant to Building Inspector J. A. A. Brown
until Chief J. O. Brown returns from the
West.

NORMAN RICHARDSON, who has been a pop-

NORMAN RICHARDSON, who has been a popular clerk in the Monongahela House during the last five years, has decided to leave this city, and will sever his connection with the Monongahela House next week. THE late William M. Lyon was buried yesterday in Allegheny Cemetery, the pallbearers being Edward Gregg, John W. Chalfant, B. F. Jones, J. H. Ricketson, W. P. Townsend, the Hon. M. W. Acheson, Christopher Zug and William Rea.

ALDERMAN REILLY yesterday held an Italian, with an unpronounceable name, for court for selling liquor without license at Sandy Creek, in the East End. The witnesses were all Italians, and it was difficult to understand the testimony.

CHIEF BIGELOW intends to level and sod the W. B. FORD, Grand Master Workman of the A. O. U. W., for this State, received \$157 75 from the Hamilton, Canada, Lodge of Workman for the benefit of the flood sufferers. He also received \$25 from Tucson, Ariz; \$368 84 from Kansas and \$166 from Ohio Lodge for the sufferers.

back at his desk yesterday after several days' absence. He had been to Erie with a committee to locate the Duquesne Grey's camp for their summer encampment commencing August 8. He reports having secured Grove House Park, four miles below Erie. They will have elegant bathing and boating, and will be right at the fishing grounds.

A SOUR stomach, want of appetite and general lassitude denote the want of a tonic, which you can supply by using Dr. Jayne's Tonic Vermifuge. It will cure most derangements of the stomach, in old or young, and rids the body of worms—the common pests of childhood.

of Its Kind in America. A PROFESSOR OF WATCHMAKING.

What He Says About Such Knowledge Outside of Workshops.

MAGNETISM BETTER OUT OF WATCHES The Pittsburg School of Watchmaking, or Horologie School, lately opened, is quite an interesting institution. Mr. L. L. Kel-

ler, teacher of technical and practical watchmaking, or horology, is in charge. Mr. Keller said, in answer to questions conin good shape. There are only three other such schools in the United States, and this certainly is a thing that Pittaburg can and will-support. Our object is to instruct pupils in the art of watchmaking and repairing, not as jewelers now do the work, but to do it in as jeweiers now do the work, but to do it in a model style. We give lectures weekly from enlarged drawings of the different parts of the fine mechanism of watches. We also teach the pupils to turn on lathes the staffs, pinions, stems, etc. These, with the screws, winding stems, wheels, hands, main and case springs and other parts of watches

A LONG TIME TO LEARN. "When the trade is learned the scholars can make, if they wish, a complete watch or clock. It usually takes five or six years to learn the business thoroughly; but they are then no botches at the work, but can take

any place in a factory. "They are also instructed in isochronism, which means the fast and slow movements of a timepiece. For instance, when a watch is wound up tight, it will run fast and when it is nearly run down it naturally runs slow. This can be prevented, but there are few watch repairers who can pre-

"The pupils are taught also the use of the ompensating heaters for drying watches." When asked why watches were dried, Mr.

Keller said:

"They are put in the heater and the heat run up to 98 or 100°, the heat of the human body. They are then taken out and exposed to the cold. The change should not be too sudden, as it will result in a perspiration, and causes the works to rust. They are kept in the heat for 24 hours. He said that watch tinkers did not have the heaters to use. He further stated that they did not understand the art of regulating i watch. This, he said, could be done by placing it in various positions, such as on its face, back, upside down and in other positions. As to non-magnetic watches, he said:

MAGNETISM A DRAWBACK. MAGNETISM A DRAWBACK.

"There is another inconsiderate practice in vogue. That is to expose non-magnetic watches to magnetism, by which all steel parts (except the escapement) of the watch become magnetized, and by repairing such watches, our heretofore perfect tools will also become magnetic, and therewith impart-magnetism to all watches that may come within reach of such tools. Non-magnetic escapements should be sufficient, without magnetizing all the steel parts of the watch; the show in the windows may be productive of making a sale, but it is at the expense of ruining thousands of valuable watches. No hair-spring of any composition whatever will stand the test of firehardened steel."

As to the number of tools used in the

Please Accompany Order With Postal or Money Order, or Draft.

sands. All parts of watches are made at the school, and screws are made one-tenth of a millimeter in diameter.

Concerning the cost of watch movements to the manufacturers, he said that a \$6 movement would probably cost the manufacturers \$2. He said there was no other watch made that will compare with the Swiss movement. Mr. Keller also stated that he made a watch and clock when he was but 16 years old, and that, from his experience, it did not pay a person to make his own timepiece.

HONORING A CLASSMATE.

A pleasant gathering took place at the residence of Principal Joseph Logan, at Hazelwood, on Thursday evening. It was a reception to Miss C. Blanche Logan, who was one of the graduates from the High School at the last commencement. Some of her friends had made up a purse to pay her expenses for a visit with the school teachexpenses for a visit with the school teachers' excursion to the Paris Exposition, and the gathering was in the nature of a goodby and bon voyage to the young lady. The persons present were all members of the High School class of 1889, and consisted of Misses Jennie M. Loughridge, Mury R. Loeffler, Bessie Graham, Margaret Clancey and Mary P. Breeze.

LATE NEWS IN BRIEF.

"-One hundred Mormons arrived by the steamship Wyoming yesterday morning and started for Salt Lake City. -Private cables from London and Hamburg deny the reported failure of Theodore Schmidt & Co., the largest coffee dealers of Hamburg. -Yesterday's bond offerings argregated \$205,000, as follows: Coupon 4a, \$100,000, at 128%; registered 4a, \$17,500, at 129; registered 434s, \$106,500, at 10654.

been found.

A bill to declare void the annexation of the Town of Lake to the city of Chicago as decreed by the recent special election has been filed in the circuit court, and an injunction was asked restraining the city from taking possession of the school property of the town. The bill sets forth a number of technical grounds for the nullification of the election. The points raised are applicable in the cases of all of the other towns annexed. No action on the application has as yet been taken by the court.

The calculation at Adair Jour had a said

has as yet been taken by the court.

The celebration at Adair, Iowa, had a serious termination, nearly 100 people having been poisoned by eating ice cream. They were at a general picnic, and after dinner the people by scores were taken with terrible pains. It was found that the ice cream was made in some new cans, and it is thought that sulphate of zinc from the cans entered the ice cream. One physician was poisoned, and that left but two doctors to attend to the great crowd of stricken people. Nearly a panic ensued at first, but in the evening they were more quiet, and it is thought that all save possibly one or two will recover.

The Chicago Board of Trade received a pretty hard rap by the decision of Judges Horton, Tuley and Collins, sitting en banc, on the motion of the attorney of the boards of attorney to dissolve the preliminary injunction to prevent the board from withholding its quotations from the bucket shops. The Judges in their decision deny the motion to dissolve the injunction on the ground that the market quotations are of such importance to the public that they should be considered public property, and that if the injunction were dissolved the tendency would be to create a monopoly of the big board.

I feel better than I ever did in my life. Blood.

Blood.

I feel like recommending it every where. Yours respectfully, Frank HICKMAN, New Straitsville, Perry Co., Ohio.

This spring Burdock Blood Bitters and using it in my family this spring. For three years I have had the dyspepsia. I got a bottle or two of your Bitters and they have cured me, and I never felt better in my life. It is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best medicine is a sure cure for dyspepsia, and best m

A Morrible Condition.

I was in a horrible condition from dyspepsis and a combination of other complaints. In the morning when I got out of bed it seemed as if I could not stand up on account of dizziness. Hearing Burdock Blood Bitters highly recommended, I am now using the first bottle, and, although not having used quite a full bottle, the dizziness has entirely disappeared and I am much better of my other complaints. I have tried many other medicines, with no relief.

with no relief.
